The parties to the management plan shall submit a monitoring plan to the State Engineer within three months after the issuance of this permit. This plan must address all aspects of potential impacts resulting from any pumping of water including the dewatering of the pit area. The State Engineer retains the right to require the parties of the management plan to cooperate in the funding of a hydrology study to be conducted by an independent third party.

A monthly report shall be submitted to the State Engineer within 10 days from the end of the month which shall include the amount pumped from each well.
